

CITY OF BOULDER

January 20, 2010

Southwest Montana Veterans Home Select Committee
% Larrey Lattin
PO Box 372
Boulder, MT 59632

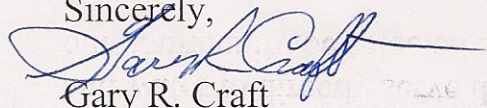

Dear Mr. Lattin:

The Boulder City Council is excited our community is being considered as the location for the Southwest Montana Veterans Home. Boulder has good infrastructure with recent water system upgrades and currently is in the process of doing the preliminary work to complete a major sewer system upgrade in the near term. In December 2009, Boulder funded and completed a new sewer service line adjacent to the proposed Veterans Home location. Other services such as gas, telephone and electricity are nearby to provide the other necessary utility requirements for the project. According to documents submitted by Jeff Larson of Stahly Engineering, the City of Boulder has the capacity and is committed to providing the necessary sewer and water to directly serve the Southwest Montana Veterans Home should our community be selected as the site.

Boulder has a proud heritage of being a caring community with over one hundred years of history in taking care of people. Our central location to a large veteran population, in the surrounding neighbor counties, coupled with the short distance to the Fort Harrison Veteran Hospital in Helena are a few of the many advantages the City of Boulder has to offer.

We stand ready to assist in any way and should you need any additional information please feel free to contact the Boulder City Hall at (406) 225-3381.

Sincerely,

Gary R. Craft
Mayor
